

MARIE-CLAIRE LAMBO

WEB DEVELOPER

Self-taught front-end developer with a proven ability to adapt and thrive in dynamic environments. Skilled in building intuitive and efficient user interfaces, I bring a strong sense of autonomy and discipline, honed through extensive experience in remote work. Currently seeking a **full-time** position or **freelance** collaboration within a forward-thinking team that values learning, flexibility, and a positive, supportive culture.

EXPERIENCE

JAN 2023 - present

FRONT END DEVELOPER

Patrowl

Frontend development : Implemented new features, pages, and continuous improvements for a web platform using Vue.js, Vuetify, and TypeScript after migrating to Vue 3 and PrimeVue.

Design : Prototyped using Figma, designed and refined user interface to enhance user experience and platform ergonomics

Platform Redesign : Contributed to the full platform refactoring, adopting a modern tech stack

Testing and Quality Assurance : Created and executed unit and functional tests using Playwright, to ensure the reliability and robustness of new features.

Agile Collaboration : Worked in an Agile environment (SCRUM), managing tasks via Jira and actively contributing to sprint planning and team collaboration.

Introduction to Cybersecurity : Gained foundational knowledge in cybersecurity concepts and the challenges related to data and system protection.
